

**THE SECOND WORKSHOP
on
RECENT ADVANCES IN FUEL CELLS**

**University of Ontario Institute of Technology
Oshawa, Canada
September 26, 2011**

The Second Workshop on Recent Advances in Fuel Cells is intended to bring the researchers, scientists, engineers, policy makers, and students from the academia, industry, and government together to share and exchange information on the latest progress in the research and development of fuel cell science and technology. This event will also lead a new effective network and collaboration between the researchers of the universities and industrial partners.

The main focus of this workshop will be the research and development of low and high temperature fuel cell systems as well as the commercialization of the fuel cells. The topics covered will include but not limited to modeling, experiments, materials, manufacturing, and future strategies, policies, and directions for fuel cell science and technology.

In this one-day workshop, there will be talks from distinguished speakers from academia, industry, and government agencies on topics related to fuel cells. There will be also panel discussion sessions and networking breaks.

Workshop Chair:

Dincer, Ibrahim, University of Ontario Institute of Technology

Organizing Committee Members (in alphabetical order):

Baniasadi, Ehsan, University of Ontario Institute of Technology

Colpan, C. Ozgur, Ryerson University

Farhad, Siamak, University of Waterloo

Hamut, Halil, University of Ontario Institute of Technology

Nabovati, Aydin, University of Toronto

Ozbilen, Ahmet, University of Ontario Institute of Technology
